About Yubikey

**All-in-one
configurable
security key**

**Easier and
safer than
authenticator
apps**

**Works with
hundreds of
services**

Secure Account with One Touch

The Yubikey Security Key works by combining hardware-based authentication, public key cryptography, and U2F and FIDO2, to help prevent phishing and secure account credentials (passwords and login ID) across various devices.

Just plug or connect the key on the device and touch the sensor, your account will be safely protected.

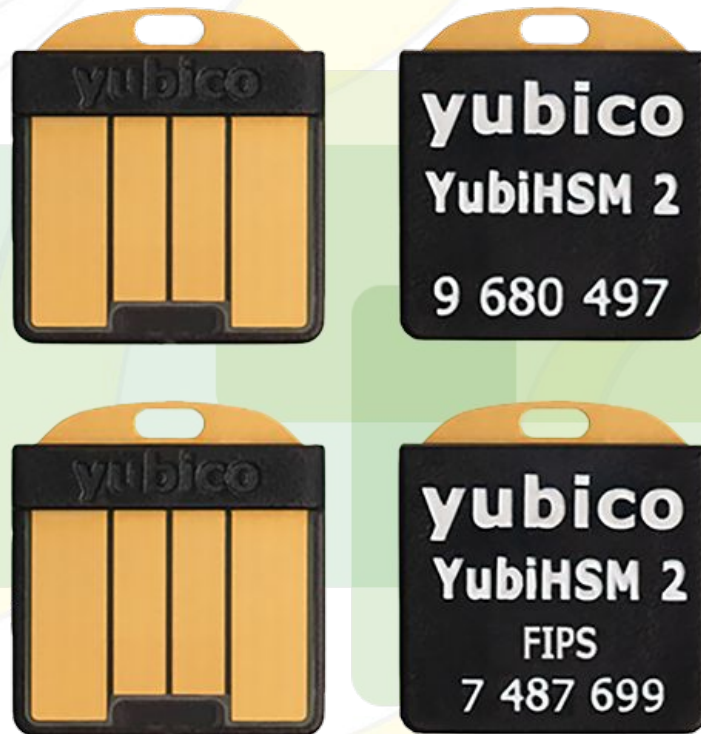

Why Yubikey?

Unique and Flexible

Yubikey Security Key is a unique hardware. The size is only as big as a USB Flash Disk and may not be bigger than your house key.

However, it comes with a variety of functionality:

- Can be used to secure login accounts for Google, Microsoft, Twitter, Facebook, and hundreds of other applications
- Supports FIDO2 and U2F
- USB-A and NFC connectivity
- Durable
- IP68 protection, impact resistance, no battery required, maintenance free

Target Yubikey

Ready to Use Yubikey?

Yubikey Security Key can be used by anyone, including store manager or end users who want to provide more advanced protection for your digital accounts.

Flexible Authentication

Choice of strong single-factor (no password), two-factor (2FA) or multi-factor authentication (MFA).

Secure Your Important Account

The strongest and most secure authentication for U2F and FIDO2 compatible services. The YubiKey Key Series can completely replace static username/password credentials with strong non-password hardware-backed security.
